

Important Notice from Datafile Software

Printing to Microsoft Word following Windows Security Update

It has come to our attention that following a recent update released by Microsoft as a 'Windows Security Update' has resulted in the disabling of a conversion utility used when printing reports from Datafile to Microsoft Word. Following the Microsoft update the error message '**Error in 1stDoc Macro. Word cannot start the converter mswrd632.wpc**' is reported when printing from Datafile to Word.

Details of the Microsoft update for any affected user can be found from <http://support.microsoft.com/kb/973904/en-us> including instructions supplied by Microsoft for updating the registry to re-enable this conversion procedure - as always care should be taken when updating the registry.

Resellers may wish to pass on details to system managers with regards procedures for updating the registry across networks. Helpful links for this include:
